Zach Rome, founder of Woodpecker Laboratories, faced a difficult problem: how to commercialize and protect his new line of children’s toys without the capital needed to hire a private patent attorney? His solution: Fordham’s Samuelson-Glushko Intellectual Property and Information Law Clinic. Here students gain valuable experience interviewing inventors and entrepreneurs, assessing cases, and drafting patent and trademark applications through participation in the U.S. Patent and Trademarks Office Pilot Program.

For Zach Rome, suddenly his legal challenges became opportunities. According to Clinical Associate Professor Ron Lazebnik, who supervises the clinic, “Acquiring intellectual property rights is very important for inventors, entrepreneurs, and lawyers alike. Our IP and Information Law clinic expands the ways students assist clients, and serves both parties alike.”

While some Fordham Law evening students are already experienced in patent practice, the clinic offers legal newbies the opportunity to receive a temporary USPTO registration number without sitting for the Patent Bar Exam. Students who receive their number are able to interact directly with patent and trademark examiners as legal representatives.

Zach Rome sums it up best: “The Fordham IP Clinic offers a huge resource to small startup businesses that might not have a lot of capital. The ability to have a patent and own your own intellectual property can be the foundation of what you’re doing. Working with the Fordham IP clinic was educational and empowering.”

Fordham Law’s related offerings include the Center on Law and Information Policy, the IP Institute, and the Fordham Intellectual Property, Media and Entertainment Law Journal. All prepare students for challenging work in this fast-changing, innovative field of law.

**Patently Good Information For Startups And Innovators**

**IP Law & Information Policy Quick Facts**

The [Fordham Intellectual Property, Media, and Entertainment Law Journal](#) is the 3rd most cited law journal devoted to IP issues.

Of students with a graduate degree entering Fordham Law in the past five years, over 50% have earned a master’s or doctorate in a science field.

Professor Hugh Hansen was recently named one of the top 50 most influential people in IP by Managing IP.

Professor Joel Reidenberg, Director of the Center on Law and Information Policy, recently co-authored an amicus brief for a U.S. Supreme Court privacy case.
