Booking a Flight

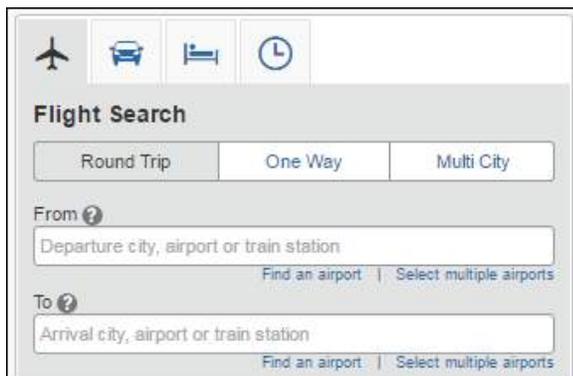

From the SAP Concur home page, use the Flight  tab to book a flight by itself or with car rental and/or hotel reservations. To book car and hotel reservations **without** a flight, use the **Hotel**  and **Car**  **Search** tabs, respectively.

Note: If your company is configured to use rail, then the **Flight**  tab may show **Air / Rail**  .

You can access the Flight  tab (or Air / Rail  ) by doing the following:

- On the SAP Concur home page, on the menu, click **Travel**.
- On the SAP Concur home page, on the menu, click the SAP Concur logo.

The **Flight**  tab (or **Air / Rail**   tab) is on the left side of the page.

Step 1: Start the Search

1. Depending on your company's configuration, you might be able to select a rule class. If so, select the appropriate rule class.
2. Select one of the following types of flight options:
 - Round Trip
 - One Way
 - Multi City

3. In the **Departure City** and **Arrival City** fields, enter the cities for your travel. When you enter a city, airport name, or airport code, SAP Concur will automatically search for a match.

Note: Use the **Find an airport** and **Select multiple airports** links as needed.

4. Click in the **Departure** and **Return** date fields, and then select the appropriate dates from the calendar. Use the remaining fields in this section to define the appropriate time range.
5. Click the  arrow to the right of the time window to see a graphical display of nonstop flights available for the routing and date you have selected. This allows you to adjust your search criteria, if necessary, to see/reserve nonstop flights.

Notes:

- The graphical display is based on flight schedule data. It will not show any rail options, nor can it take refundability or class of service preferences into account.
- Each green bar represents 30 minutes of time. Place your mouse pointer over a green bar to see all of the flights available for that time slot.
- If you change locations or dates, click **refresh graph** for more data.

6. If you need a car, click the **Pick-up / Drop-off car at airport** check box.

A screenshot of a form with two checkboxes. The first checkbox is labeled "Pick-up/Drop-off car at airport" and the second is labeled "Find a Hotel". Both checkboxes are currently unchecked.

- Depending on your company's configuration, you might be able to automatically reserve a car, allowing you to bypass viewing the car search results. When you select this option, additional fields appear. Select a vendor and car type; the car is automatically added to your reservation.
- If you need an off-airport car or have other special requests, you can skip this step and add a car later from your itinerary.

7. If you need a hotel, click the **Find a Hotel** check box.

Additional fields appear.

- Choose to search near an **Airport, Address, Company Location, or Reference Point / Zip Code**, and then enter the appropriate information in the available fields.
- If you are staying at more than one hotel during your trip or do not need a hotel for the entire length of your stay, you can skip this step and add a hotel later from your itinerary.

Note: Before booking, canceling, or changing your hotel reservation, verify the hotel's cancellation policy. Hotel cancellation policies have recently become much stricter. Fees will likely apply.

8. Depending on your company's configuration, you might be able to specify an airline. If so, the **Specify airline** check box appears.

Note: You can only search one vendor at a time, and this will override the preferred airline searches normally done for all of the frequent flyer number carriers.

If you click the **Specify airline** check box, a list of carriers appears that are color coded:

- The first (yellow) will be their frequent flyer carriers.
- The second (gray/khaki) are the most requested airlines.
- The remaining airlines are in alphabetical order.

9. Depending on your company's configuration, you might be able to book for a companion. If so, select from the **Number of adults** list.

Note: If a companion is selected, the payment screen provides the option to use the credit card from the companion's profile.

10. Depending on your company's configuration, you might be able to select the appropriate class of service.

- For **Search flights by**, select either **Price** or **Schedule**. (Depending on your company's configuration, you may not have these options or you may have an additional option: **Multi-Fare**.)

Creating an Expense Report Based on a Completed Trip

If you use SAP Concur Expense, from the Upcoming Trips tab, you can create an expense report based on a trip.

To create an expense report based on a completed trip:

1. On the SAP Concur home page, on the Quick Task Bar, click the **New** task, and then click **Start a Report**.

OR

On the menu, click **Expense > Manage Expenses** (on the sub-menu). Under Active Reports, click the **Create New Report** tile.

2. Complete all required fields (indicated with a red bar) and the optional field as directed by your company. (The fields that appear on this page are defined by your company). Some products might go directly to the expense reporting page.
3. Click **Next**.

The expense report page appears. At this point you can add your out-of-pocket expenses and your company card transactions.

Note the following:

- The **Expense** link appears when the actual expense is incurred
- For hotel and car segments, the expense is incurred at check-out or when the car is returned, so the **Expense** link will not appear until the trip is completed (the last date of the trip).
- For an air expense, an **Expense** link might appear, depending on your company's configuration.

If the Expense configuration allows air to be expensed when it is paid for (generally well in advance of the actual trip), then the link appears once the air has been ticketed.

If the Expense configuration does not allow for pre-trip air reimbursement, then the link appears after the trip is completed (the last date of the trip).
