Announcing a 5-week course in July of 2020 at Fordham University in Manhattan on **

**Urban psychology**

"How does living in a large city impact us--our inner personality, outer behavior, values and relationships?" "What makes the New York City experience unique?" This interdisciplinary urban studies course focuses on these two questions, including the methods and findings of behavioral research on: the origins and growth of cities, crowding, prosocial and antisocial behavior, primary and secondary relationships, ethnicity, happiness, deviance, pace of life, urban personality, the future of cities. This course meets 3 days weekly (Tues/ Wed/ Thurs), including 4 Wednesday field excursions in New York City.

Harold Takooshian is Professor of Psychology & Urban Studies at Fordham University in New York since 1975. A student of Stanley Milgram, he applies scientific methods to study city life. The field experiences will be led with noted Gothamist Lee Michael Klein.

**This is part of the Fordham summer program, June 30-August 4, 2020**

Wed 29 Class research presentations [I]

Thur 30 Class research presentations

Aug 4 EXAM 3

* The course grade is based on 2 of 3 exams, and the research report (33% each). Class participation is also considered. The schedule is flexible to allow for class discussion and guest speakers. The four NYC excursions on Wednesdays complement the course topics.

Suggested timetable for NYC research projects:

A consider topics; B select a topic; C decide a hypothesis & method; D begin intro & data; E end intro & data, F begin analysis & discussion; G end discussion; H Assemble entire draft.

I 12-minute class presentations on July 29. Final report due on August 4. Early drafts accepted.
JOURNAL OF SOCIAL DISTRESS AND THE HOMELESS

Special issue: Social psychology of city life

Volume 14, number 1 (January-March 2005)

Guest Editor: Harold Takooshian
"What impact has city life on its individual residents--personality, values, behavior?"
George Simmel's 1905 publication of "The metropolis and mental life" remains a seminal essay on this central yet neglected question. To salute the centenary of Simmel's essay, the Journal of Social Distress and the Homeless is offering a special issue in 2005, to gather data-based reviews on diverse aspects of city living.

Introduction: Urban psychology: Its history and current status
Harold Takooshian, Fordham University

The urban psychology of Stanley Milgram
Thomas Blass, University of Maryland-Baltimore County

An increase in noise and a decline in civility
Arlene Bronzaft, Lehman College CUNY

Urban stress and mental health: The impact of social context on resilience
Keva M. Miller & Michael H. Phillips,
Fordham Graduate School of Social Service

Human settlements and urban life: A United Nations perspective
Peter R. Walker, United Nations

Remembering Catherine "Kitty" Genovese 40 years later: A public forum.
