Making Your Blackboard Course Website Available
Blackboard Course Website Availability

• When a Blackboard course website is available, students enrolled in the course can access the website.
• The default setting for your Blackboard course is unavailable.
• You will need to change the default setting from unavailable to available if you want your students to access the course website.
Make sure that Edit Mode is ON. Edit Mode allows you to make changes to the course website.
Scroll down. On the lower left, click **Customization**.
This menu will appear. Click **Properties**.
This is the course **Properties** page.

Scroll down to change the course availability.
Under **Make Course Available**, click **Yes**.
Click **Submit**.
You should see this Success notification.
Blackboard Course Website Availability

• Now that your course website is available, your students can access any content, assignments, discussion forums or tests that you post.
