From the Chief Research Officer

As we review the past five months, the entire academic year could be divided into before and after the ramped up response to the COVID-19 pandemic. Unlike anything previously seen by our community, its enormous impact was felt by all of Fordham University and the entire world.

Fordham ceased face-to-face instruction at 1 p.m. on Monday, March 9, due to the threat posed by the COVID-19 outbreak. Faculty were faced with the challenge of providing quality instruction in a very short span of time. On March 13, the decision to suspend face-to-face classes was extended through the end of the semester.

Father McShane’s emails have bolstered and steadied us as we all learn to cope with the effects of this horrible virus.

In an email sent on March 22 to faculty and academic staff, Provost Dennis Jacobs applauded the “creativity and ingenuity” of faculty in quickly making the transition from face-to-face to online instruction. The Office of Research would also add our thanks for all you do for Fordham in these difficult times.

Please do not hesitate to contact me with your questions or suggestions, and, most importantly, please stay safe.

George Hong, Ph.D.
Chief Research Officer and
Associate Vice President of Academic Affairs

Five Distinguished Research Awardees – 2020

These are the awardees for Distinguished Research listed by category. Please see pages 2 and 3 for more details on each one.

- Distinguished Research Award in the Humanities - Dr. Kathryn Reklis
- Distinguished Research Award in Interdisciplinary Studies - Dr. Yi Ding
- Distinguished Research Award for Junior Faculty - Dr. Asato Ikeda
- Distinguished Research Award in the Natural Sciences - Dr. Thaier Hayajneh
- Distinguished Research Award in the Social Sciences - Dr. Iftekar Hasan
2020 DISTINGUISHED RESEARCH AWARDEES:

Humanities: Dr. Kathryn Reklis

During her eight years at Fordham, Dr. Reklis has had significant success securing external grants in the humanities and modeling engaged humanities research. She is Co-Director of the Institute for Art, Religion and Social Justice, which she co-founded in 2009. From 2010-2018, she was a Research Fellow for the New Media Project at Union Theological Seminary, where she concentrated her work on theology, religious practice, and the teaching program on new media use and theology. As an intellectual visionary, Dr. Reklis’s leadership encompasses innovative interdisciplinary methods of religious studies, teaching a wide range of topics concerning racial, gender, sexuality, and religious diversity while bringing together undergraduate and graduate students, and faculty. She has received total awards of $145,820 in the past three years from the Henry Luce Foundation and other funding agencies and has published three refereed articles and book chapters and one book, forthcoming this spring.

Junior Faculty: Dr. Asato Ikeda

Dr. Ikeda’s research interests lie in modern Japanese art in particular and Asian art in general, and the topics of imperialism/colonialism, war, fascism, museums, sex, gender, and sexuality. Her primary research is about Japanese paintings produced during the Second World War. Her productive scholarship has been published as a book The Politics of Painting: Japanese Art and Fascism during the Second World War from the University of Hawaii Press, which has been reviewed in major scholarly journals. She has also been active as a curator, and has been keen to engage with the public about important social and political issues through art. The most recent exhibition she curated was A Third Gender: Beautiful Youths in Japanese Prints, installed at Japan Society in Manhattan, in 2017. In the past three years, Dr. Ikeda has received external grants from the prestigious Franklin Grant American Philosophical Society and has presented research outcomes on two different projects in the form of a monograph, an art exhibition, and a blind peer-review journal article.

Interdisciplinary Studies: Dr. Yi Ding

In the past three years, Dr. Ding has published 29 peer refereed journal articles with focus on STEM learning and training issues in school psychology and pupil related services and has received external funding as co-PI from the U.S. Department of Education, totaling $1,249,614. Her interdisciplinary research interests include learning disabilities, developmental disabilities, STEM learning, and special education and school psychology issues based on a multicultural perspective. Dr. Ding’s research and grant activities have made a remarkable contribution to the Graduate School of Education and to the field of education at large. Her work increases the visibility of Fordham University’s scholarly work at the federal level and advances the mission of the greater community of education.
2020 DISTINGUISHED RESEARCH Awardees:

Natural Sciences: Dr. Thaier Hayajneh

Dr. Hayajneh is the founder and director of Fordham Center for Cybersecurity and director of the cybersecurity programs at Fordham University. His research focuses on cybersecurity and networking, including wireless security, applied cryptography, blockchain and cryptocurrency, and IoT security, privacy, and forensics. His research was funded by NSA, DoD, NSF and he published over 85 papers in reputable journals and conferences. In the past three years, he produced over 40 journal articles and conference papers and has received four grants of more than $840,000 from the National Security Agency and Department of Defense. Dr. Hayajneh’s research efforts have enhanced the national and international reputation of Fordham through this research collaboration.

Social Sciences: Dr. Iftekhar Hasan

Dr. Hasan is the Academic Program Director of the Gabelli School of Business Ph.D. program and the Co-Director of the Center for Research in Contemporary Finance. His recent academic accomplishments outside Fordham University include: the prestigious Changjiang scholar academic award in China; academic fellow recognition at the University of St. Andrews in Scotland; the Shimomora Fellow award in Japan; and academic fellow appointments at the Wharton School, the Stern School of Business, and the IWH Institute in Germany. Among his many notable academic engagements, he has served as a scientific advisor at the Central Bank of Finland and the Federal Reserve Bank of Atlanta, and he has held visiting scholar positions at the Central Bank of France and the IMF. In the past three years, Dr. Hasan has published one book, three book chapters, and over 62 journal articles, of which 12 are in the very top journals in the profession. Dr. Hasan’s academic research publications have so far generated around 19,000 google scholar citations with a H-Index of 68 and i-index of 216.
Fordham’s 2020 Inaugural Research Day has been re-scheduled and will take place on Monday, December 14 from 11am – 4pm at the Law School. Along with presentations by the five distinguished research awardees (see pages 2 and 3) and a keynote speaker, guests will hear brief presentations from Fordham faculty on their research, and will be able to peruse a display of new books with Fordham authors and editors. Registration details are forthcoming. We look forward to seeing you there. Please mark your calendars.

**Fordham University’s Inaugural Research Day - Program**

Monday, December 14, 2020
11:00 am - 4:00 pm

Lincoln Center Campus
Costantino, Law School (Second Floor)

11:00 am - 4:00 pm - Session I: New Book Exhibition (Outside of Costantino)

12:00 noon - 12:30 pm Lunch

12:30 - 1:10 pm - Session II: Distinguished Research Awards Ceremony

1. Introduction: Dr. George Hong, Chief Research Officer and Associate Vice President for Academic Affairs

2. Opening Remarks: Reverend Joseph McShane, S.J., President

3. Awards Presentation: Dr. Dennis Jacobs, Provost and Senior Vice President for Academic Affairs

4. Presentations by the Awardees

- Distinguished Research Award in the Humanities – Kathryn Reklis, A&S
- Distinguished Research Award in Interdisciplinary Studies – Yi Ding, GSE
- Distinguished Research Award for Junior Faculty – Asato Ikeda, A&S
- Distinguished Research Award in the Natural Sciences – Thaier Hayajneh, A&S
- Distinguished Research Award in the Social Sciences – Iftekhar Hasan, School of Business

1:10 - 2:15 pm - Session III: Keynote Speech

Chair: Dr. Jonathan Crystal, Vice Provost

Introduction: Dr. Laura Auricchio, Dean of Fordham College at Lincoln Center

Keynote Speaker: Dr. Daniel Alexander Jones [TBD], Associate Professor of Theatre at Fordham University, 2019 Guggenheim Foundation Fellow, and 2019 Helen Merrill Playwriting Award
Inaugural Research Day – December 14, 2020

2:30 - 3:30 pm - Session IV: Meeting New Book Authors

Part I: Humanities Books (Costantino Room A)

Chair: Dr. Eva Badowska, Dean, Faculty of Arts and Sciences and Associate Vice President, Arts and Sciences

Presenters:

1) Dr. Kirsten Swinth (Department of History), Book Title: *Feminism’s Forgotten Fight: The Unfinished Struggle for Work & Family*
2) Dr. Daniel Soyer (Department of History), Book Title: *Jewish New York: The Remarkable Story of a City and a People*
3) Dr. Kirk Bingaman (Graduate School of Religion and Religious Education), Book Title: *Pastoral & Spiritual Care in a Digital Age: The Future Is Now*
4) Dr. Asato Ikeda (Department of Art History and Music), Book Title: *The Politics of Painting: Fascism and Japanese Art during the Second World War*

Part II: Social Science Books (Costantino Room B)

Chair: Dr. Yi Ding, Chair of the University Research Council

Presenters:

1) Dr. Nicholas Tampio (Department of Political Science), Book Title: *Common Core: National Education Standards and the Threat to Democracy*
2) Dr. Arthur Hayes (Communications & Media Studies), Book Title: *Communication in the Age of Trump*
3) Dr. Annika Hinze (Department of Political Science), Book Title: *City Politics: The Political Economy of Urban America*
4) Dr. Clara Rodriguez (Department of Sociology and Anthropology), Book Title: *America, As Seen on TV: How Television Shapes Immigrant Expectations Around the Globe.*

Part III: Interdisciplinary Studies Books (Costantino Room C)

Chair: Dr. Debra McPhee, Dean, Graduate School of Social Service

Presenters:

1) Dr. Tina Maschi (Graduate School of Social Service), Book Title: *Forensic Social Work: A Psychosocial Legal Approach to Diverse Criminal Justice Populations and Settings* (2nd edition)
2) Professor Tanya Hernández (Law School), Book Title: *Multiracials and Civil Rights: Mixed-Race Stories of Discrimination*
3) Dr. Sarah Lockhart (Department of Political Science), Book Title: *Migration Crises and the Structure of International Cooperation*
4) Dr. Allan Gilbert (Department of Sociology and Anthropology), Book Title: *Digging in the Bronx: Recent Archaeology in the Borough*
The Fordham Social Innovation Research Fellow and Intern Program held a symposium at the Fordham Law School on February 12, 2020. It was a culmination of the research team efforts for the first cohort which formed early in the fall semester.

**Agenda**

**Opening remarks**

Chair: **Dr. Donna Rapaccioli**, Dean, Gabelli School of Business

Opening Remarks: **Dr. Dennis Jacobs**, Provost and Senior Vice President for Academic Affairs

**Presentations by Fellows and Interns**

*(20 minutes for each team followed by Q&A 10 minutes)*

1. **Su-Je Cho**, Associate Professor, Curriculum & Teaching, GSE, **Kathleen Doyle**, Ph.D. Student, GSE, **Kijung Ryu**, Ph.D. Student, GSE, and **Camille Smith**, M.Ed. Student, GSE

   Project Title: “Understanding the Needs of Sex Education for Students with Disabilities”

   Project Title: “Impact Investing, Materiality, and Corporate Environmental Sustainability”

   Project Title: “Social Innovation, Humanistic Management, and Impact Investing: Protecting Dignity and Promoting Well Being”

   Project Title: “Innovative Paths to Successful Integration for Asylum Seekers and Refuges in NYC: Bridging the Gaps in Higher Education Institutions”

**Afternoon Presentations after lunch** (see next page)

Chair: **Dr. Maura Mast**, Dean, Fordham College at Rose Hill
Fordham Social Innovation Research Fellow & Intern Program Symposium

Project Title: “Social Innovation and Food Justice in Urban Agriculture Technology”

6. Catherine Powell, Professor, Law, Daria Brosius, J.D. Student, Law, Gabriella Romanos, J.D. Student, Law, and Elias Wright, J.D. Student, Law

Project Title: “Digital Civil Rights and Civil Liberties”

Project Title: “Targeting Teacher Absenteeism in India using Technology and Incentives”

8. Fuhua Zhai, Associate Professor, GSS, Aihemaitijiang Maidina, Ph.D. Student, GSE, Naishuo Sun, Ph.D. Student, GSS, and Xiaoran Wang, Ph.D. Student, GSS

Closing Remarks

Dr. George Hong, Chief Research Officer and Associate Vice President for Academic Affairs
On March 4, 2020, Ms. Aferdita Krasniqi, Outreach and Recruitment Officer, Europe/Eurasia Team Lead of the Fulbright U.S. Scholar Program, made a presentation to faculty at the Rose Hill campus.

Faculty members representing the departments of Communications, Economics, History, Mathematics, and Philosophy, as well as faculty from the Graduate School of Social Services attended the 90-minute long event. Beginning with a presentation on the Fulbright history, Ms. Krasniqi discussed opportunities for teaching, research, and flexible initiatives in more than 140 countries, tips on how to craft a competitive application, including how to make contacts abroad and choosing the right country and award. The event included discussion of questions about the program.

Ms. Krasniqi joined the Institute for International Education (IIE) in June 2017 after 17 years as Cultural Exchanges Advisor at the U.S. Embassy in Kosovo. In 2020, she marked 20 years of working in the Fulbright Program.

In addition to the presentation at Rose Hill, in January, Ms. Krasniqi spoke to faculty members at Fordham’s Lincoln Center campus. A separate presentation to students in January was sponsored by Fordham’s Office of Prestigious Fellowships.
This forum has been re-scheduled to October 29, 2020. The topic for this first event is “Immigration, Invisible Borders, Sanctuary, and Education.”

**Program:**
Fordham Socially Engaged Learning Talks (SEL Talks)

**Topic:** **Immigration, Invisible Borders, Sanctuary, and Education Studies**
6:00 pm – 8:00 pm, October 29, 2020 (Thursday)
Fordham University Law School, Room 7-119

Organized by the Office of the Provost
Sponsored by the Office of Research
Fordham Strategic Research Consortium on Global Studies

“No (body) is an island entire of itself; every (body)
is a piece of the continent, a part of the main” -John Donne
What do these 400-year-old lines mean to us today?

**Speakers:**
**Dr. Faustino Cruz**, Professor and Dean of the Graduate School of Religion and Religious Education, “Educating Immigrants for Social Engagement: the Role of Jesuit Catholic Universities”

**Dr. Leo Guardado**, Assistant Professor of Theology, “Nonviolent and Holy Resistance Against State Violence”

**Dr. Annika Hinze**, Associate Professor of Political Science and Director of the Center for Urban Studies, “Urban Rebels: Sanctuary Cities as a Challenge to Federal Immigration Law?”

Opening Remarks: **Dr. Dennis Jacobs**, Provost and Senior Vice President for Academic Affairs, Fordham University

Discussant: **Dr. Oswaldo Benavides**, Founding Director of the Strategic Research Consortium on Global Studies, Professor and Chair of the Department of Sociology and Anthropology

Facilitator: **Dr. Ann Higgins-D'Alessandro**, Professor of Psychology
The Columbia-NYU-IBM Fellow and Intern program has a new cohort. The selection process has been completed, and those selected for 2020 appear below.

There are now nearly twice as many Research Interns as there were last year. Congratulations!

This initiative led by Fordham’s Strategic Research Consortium on Global Studies on January 23, 2020 was designed to highlight key global events/holidays for important transnational communities that are a critical part of New York City’s historical and contemporary legacy. This inaugural event focused on the Lunar New Year, a common holiday in Asian and Asian American cultures.

Provost Dennis Jacobs gave welcoming remarks prior to the keynote speaker Dr. Yiju Huang, Associate Professor of Chinese Literature in Fordham’s Department of Modern Languages. Dr. Huang’s talk was titled “Ink & Brush: the Art of Creation during Spring Festival.” A roundtable discussion, chaired by Dr. Hugo Benevides, Founding Director of the Strategic Research Consortium on Global Studies, was held to discuss the significance of the varied traditions and personal reminiscences of three panelists drawing from their native countries at this particular holiday season. After dinner, those gathered enjoyed musical and dance performances, which were sponsored by the Chinese Student and Scholar Association at Fordham.
The third cohort of the Faculty Research Abroad Program (FRAP) to Brazil has been postponed due to the current travel restrictions related to the COVID-19 pandemic. The originally scheduled trip to Brazil was to take place this summer of 2020. The new projected time for the next FRAP will be in the summer of 2021.

The objective of this funding opportunity is to provide funds to stimulate interdisciplinary and inter-school research. The larger objective is to allow faculty to leverage preliminary results obtained with this funding to enhance their external grant activities. Congratulations!

Clint Ramos
Fordham Designer is a 2020 USA Fellow

You were selected to be a 2020 USA Fellow in Theatre and Performance. Why is that important to you? I think there are a couple of things that are notable about this year’s Theatre and Performance fellows—we are all people of color and I am also one of the few theatre designers who have gotten this fellowship (in its history). These two things really point towards a thrust in undoing some invisibility that both my person and chosen field implicitly carry. I do quite a substantial amount of advocacy of both diversity in the field and the plight of theatre designers, that receiving this fellowship really means an acknowledgment of the confluence of both. I thank the United States Artists and the Doris Duke Foundation for hearing our voices.

How will the cash grant that comes with this award help you in your work? Well this grant could not have come at a more fortuitous time. Of course, all of my theatre and film work have ceased to exist so this grant really is a life-saver right now as we face multifaceted uncertainty both economically and artistically. At the moment this grant is allowing me invaluable time to re-group and re-imagine the “what” and the “how” of the very thing to which I’ve devoted my life. Sustenance and sustainability are leasing vast amounts of real estate in my brain these days. I’ve always believed that sustaining the artists is sustaining the arts.

Whose design work inspires your own work? Overall I work very hard to be as malleable as possible so I expose myself to all designers. I especially love designers who are independent voices, they don’t necessarily need to be revolutionaries but they need to be singular. I love the Belgian school of fashion like Ann Demeulemeester or Raf Simmons for their essentialism. I also love the Dutch-Chinese designer Fong Leng for her intricate sense of humor and wit. I get a lot of inspirations from artists like Petah Coyne and Darren Waterston, and photographers like Jurgen Teller and Wolfgang Tillmans. For theater designers, Eiko Ishioka is up there for me as well as Robert Israel. My teachers Paul Steinberg for his artistic distillation and Susan Hilfetry for her sense of logic and style.
Spotlight on Faculty/Academic Staff

James Stabler-Havener
Director of IALC and its community outreach

James Stabler-Havener is the Director of IALC (Fordham's Institute of American Language & Culture), which offers English courses to Fordham students as well as adult learners in the community. In addition, Mr. Stabler-Havener has also partnered with a number of Fordham and community-based organizations for IALC's Community ESL Program (CESL). In 2018, IALC was awarded an annual $100K Adult ESOL/Literacy contract by NYC's Department of Youth and Community Development (DYCD) Adult Literacy Program.

What is the work that this NYC grant supports, and why is it important?

More than 200 adults in the Bronx receive free literacy and ESL classes through IALC's Community ESL program (CESL). Students can attend free literacy classes at Our Lady of Mt Carmel Parish in the morning and on the Rose Hill campus in the evening. More than 40% of Bronx District 7 residents are foreign born and approximately 37% self-identify as having “limited English proficiency.” This is Fordham's community, and similar rates can be found in surrounding districts. This impacts our neighbors' earnings/employability; further, the Department of Health notes that limited English proficiency also leads to higher rates of healthcare incidents since this population may have difficulty describing medical conditions and often avoids hospitals. For this reason, our curriculum focuses on practical language skills students need for work, health, and social settings. Students are pre-tested and post-tested each semester to measure educational gains. In order to maintain funding, we must show steady attendance and educational gains. We are proud to say the Community ESL program has been “far above standard” on all evaluation benchmarks.

What other funding sources have helped you in community outreach?

Each year, we have 70-100 people on a waiting list to join CESL classes. In 2019, with support from DAUR, we were awarded a $116K grant from the Mother Cabrini Health Foundation to expand the Community ESL program. This enabled us to partner with another local parish and to offer additional classes in the morning and evening. Individuals have also donated funds and resources to help cover the cost of supplies.

What other help have you received in this important work?

Jesus Aceves-Loza, CESL program manager, has worked tirelessly to build connections throughout the Bronx and with other organizations in the city. For example, we were able to collaborate with the NYC Dept of Health to offer Mental Health First Aid training to our students—in their mother tongue. We have also been able to partner with the New-York Historical Society to offer free citizenship classes. Another partner offered “workers’ rights” seminars. Roxanne de la Torre, Director of Campus/Community Leadership for Fordham’s Center for Community Engaged Learning, helps connect us with student volunteers, and we are blessed to partner with the Jesuit scholastics in Ciszek Hall.

You have made clear the benefits of this community outreach. What have been the greatest challenges you face?

Our greatest challenges are in two areas: funding continuity and hardships faced by the students. 1) Our funding is limited and it is provided on an annual contract. There is a tremendous amount of paperwork and (weekly) reporting—as well as a bit of anxiety regarding the condition of the city budget. 2) Our students’ circumstances can be quite difficult, and the pandemic has been merciless. The program operates outside Fordham’s IT structure, so the switch to “remote learning” has meant teaching through WhatsApp. It’s not ideal, but the students are engaged and the entire Community ESL program--staff, students and instructors—are incredibly dedicated.
Spotlight on Faculty/Academic Staff

Marc Conte
Fordham Economics Professor wins NSF Grant

Thanks to a $750,000 grant from the National Science Foundation, associate professor Marc Conte, Ph.D is embarking on an ambitious five-year-long project, "Understanding the Coupling Between Climate Policy and Ecosystem Change," a collaboration with Frances C. Moore, Ph.D., and Xiaoli Dong, Ph.D., both assistant professors in the Department of Environmental Science and Policy at the University of California, Davis. The study seeks to update and expand the current estimates of the cost of carbon on society.

Why is this particular research important?
Humans are a part of nature and derive great pleasure from the environment, as we have seen in our turn toward nature for solace during the COVID-19 pandemic. Our project aims to provide a more accurate measure of the costs of climate change, which poses a threat to society in many ways, including through damages to the natural world. We will do this by placing dollar values on the nonmarket benefits that we derive from nature and functioning ecosystems, to include the climate damages to the natural world in the overall estimate of climate damages. Providing a more comprehensive understanding of the impacts of climate change is a necessary step to develop effective climate policy. We think that the challenge of credibly estimating these values must be taken on, given that the alternative is their omission from our climate-policy decisions.

What are the successes and challenges so far in this ambitious project?
Our ability to develop defensible methods to identify and then value climate impacts is partly determined by the extent of species and ecosystem services that have been studied and valued previously. So, our primary challenge is to develop and identify techniques to help us fill in the gaps of these existing studies in ways that are appropriate, novel, and replicable. While we are in the beginning phase of the project, we have identified some methods to accomplish this goal that seem to have merit, based on application in other contexts. Our key success is the assembly of a talented and motivated research team that possesses the expertise and enthusiasm to pursue our lofty goals.

When you say, “ecosystem services”, do you mean that you are placing a dollar value on things like clean air, clean water, mountains, and flowers?
You are correct that air and water filtration are examples of “ecosystem services.” This term describes the benefits that accrue to society from functioning ecosystems. The sight and smell of flowers and the ability to hike/climb mountains are “ecosystem services” as well. A less obvious example is the reduced flow of surface water following intense rainstorms due to vegetation on the landscape, which mitigates flooding downstream. The problem from an efficiency perspective is that many of these “services” benefit people with no say in the decisions that determine the amount of “services” provided. Furthermore, few of these “services” are market goods, meaning that there are no prices available as a signal of their value, exacerbating their under-provision.

What are the outcomes you and your collaborators hope to achieve?
A goal that we will be able to achieve is the publication of several academic papers in ecology, economics, and natural science journals, which we hope will promote additional consideration in each of these literatures of the valuation of nonmarket ecosystem services and the welfare impacts of climate change. A more ambitious outcome would be for our findings to impact the design of future climate policy. Existing analyses demonstrate that the time to act is now, and our efforts to make model outputs more accurate should provide further clarity about the net benefits of policies that meaningfully address climate change.
Monica Rivera Mindt
Fordham Professor and Neuropsychology Researcher

Monica Rivera Mindt, Ph.D., A.B.P.P. (Neuropsychology) is a Professor of Psychology and of the Latin American Latino Studies Institute at Fordham, and she is a Past-President of the Hispanic Neuropsychological Society. As a teacher, mentor, and researcher, much of her work focuses on bridging the gaps in the overall U.S. cognitive health profile with regard to underserved groups, such as Latinx, African American, LGBT and other overlooked minorities. Her current research grant portfolio exceeds $1 million.

What neuropsychology research projects are you currently conducting?

The COVID-19 pandemic highlights a long-standing and urgent public health issue here in the U.S. -- the profound health disparities and lower health outcomes experienced by Latinx, African-American and other underserved minority populations. These disparities appear in compromised brain health, including increased risk for Alzheimer's disease, vascular dementia, and HIV-associated Neurocognitive Disorder. To that end, I am currently Principal Investigator (PI) of a project funded by the NIH/National Institute of Aging and the Alzheimer's Association: the "Study of Aging Latinas/os for Understanding Dementia (SALUD)." SALUD means 'health' in Spanish, and this project is important to understand the risk and resilience factors for brain health for older Latinx adults.

I am very proud to serve as Co-PI and Mentor on two student-led studies. Vanessa Guzman (Fordham Clinical Psychology Doctoral Program [CPDP], 5th Year) and I are working on a NIH/National Institute of Minority Health & Health Disparities-funded study to understand the longitudinal effects of hypertension and HIV on cognitive aging in African-Americans. Micah Savin (CPDP, 2nd Year) and I are working on a National Science Foundation-funded study to understand the neurocognitive effects of LGBT minority stress in older persons living with HIV. Together, this work is dedicated to understanding and promoting brain health in underserved minority populations.

What are the successes and challenges you have had so far with this research?

A major challenge is that Latinx and other underserved minority populations are sorely underrepresented in research due to numerous barriers (e.g., cultural distrust; lack of bilingual investigators, examiners, and measures; outdated and culturally-insensitive research practices). This is a serious public health problem, because research needs to include these populations to better understand our current healthcare challenges and inform evidence-based interventions to improve health and brain health outcomes. A success within my program is my community-based, culturally competent approach to research. This approach has yielded strong engagement and retention of research participants from Latinx and other underserved minority populations, and I believe it will be critical for advancing public health in this country.

What are the outcomes you hope to achieve from your research?

Ultimately, I hope that my work serves to advance health and brain health equity for all people living here in the U.S. Because of my current personal recovery from COVID-19 infection, I am now also grappling with what it means to be living through this historic moment and what lies ahead for all of us. Regarding my research, I am eager to understand how the health and brain health of Latinx and other underserved minority populations will be affected by the pandemic both directly and indirectly through socioeconomic and other stressors. Regarding health policy, I am also deeply concerned about the looming 'second pandemic' of COVID-related mental health sequelae across the lifespan, but particularly for our children, adolescents, and young adults. If people are interested in learning more about my work, I hope that they reach out on Instagram or Twitter (@DrRiveraMindt).
In the News

Professor’s Research Highlights Last Acceptable Prejudice
Patrick Verel of Fordham News covered how discrimination among employees 50 and older is the last acceptable prejudice in the workforce. Carole Cox, a professor at Fordham’s Graduate School of Social Service, has spent a career studying gerontology and social policy. In 2015, she dedicated an entire chapter to employment and retirement in her book Social Policy for an Aging Society, A Human Rights Perspective. “Ageism remains the last form of discrimination that’s widely accepted in our culture,” she says, “and it’s critical that we overcome it if we want to grow and thrive as a society.”

Research on rat control in cities makes media across the country
Jason Munshi-South, professor of biological sciences, and Michael H. Parsons, visiting research scholar, discuss how rat populations in cities can be controlled by managing food-waste in a new piece published in The Conversation. Rats adapt to human food sources and reproduce accordingly. Thus, the less food there is available, the less a rat will reproduce.

Students Map Genes on Zebrafish Embryos
Fordham Lincoln Center Junior, Eveline Murphy-Wilson and her partner in the lab, junior Jessica Caushi, were tasked by Alma Rodenas-Ruano, Ph.D., assistant professor of neuroscience in the Department of Natural Sciences at Fordham College at Lincoln Center with creating an epigenetic map of the KCC2 Chloride transporter in neurons in developing zebrafish. In other words, they are using developmental neuroscience with the zebrafish to look into the mechanisms behind the nervous system.

Research Internships Taking the Initiative
As with any urban habitat, invasive species, both flora and fauna, are a constant problem for caretakers. Kylie Rothwell and Julia Duljas, natural science majors at Fordham College at Lincoln Center (FCLC), recently worked alongside those caretakers to learn about these species and habitat restoration.
Two History Professors Earn Prestigious Humanities Grants

Scott Bruce, Ph.D., and Yuko Miki, Ph.D., both members of Fordham’s department of history were recently awarded National Endowment for the Humanities grants, which will allow both of them to undertake ambitious new research projects.

Bruce, a professor of history, will use his grant to launch The Lost Patriarchs Project: Recovering the Greek Fathers in the Medieval Latin Tradition, a massive cataloging project that could take as long as a decade to complete.

For Miki, an associate professor of history, the grant will give her time to write Brazilian Atlantic: Archives and Stories of Illegal Slavery, a book about illegal slavery in the 19th-century Atlantic World that she has been working on for several years.
