Developed in response to the increasing importance of computational methods and data analytic skills in the job market, Fordham’s dual degree option allows students to gain a deeper understanding of economic theory and computational methods, while having the time and expertise to engage in research projects that link Data Science and Economics.

Ideal for students from a wide variety of quantitatively-focused academic backgrounds, including psychology, urban planning, health sciences, and more.

- 15-Courses (45 credits)
- Courses held at the Rose Hill campus in the Bronx and Lincoln Center campus in midtown Manhattan
- Bachelor’s degrees in Economics or Computer Science not required
- Students must first apply and be admitted to either the M.A. in Economics or M.S. in Data Science as their primary program.
