About the Program:

On April 14, Arnaud Latil, a widely respected researcher and lecturer from Sorbonne University in Paris, will present his most recent work on the EU's risk-based approach to cybersecurity. He will then lead a discussion on how proportionality, categorization of risk, and differentiated obligations shape digital law and policy in the EU. The conversation will situate current and emerging regulatory frameworks within broader debates about innovation, security, and sovereignty. The conversation will be of interest to scholars, practitioners, and students engaged with technology regulation, data governance, and comparative law. Professor Olivier Sylvain will moderate the discussion.

Speaker:

Arnaud Latil

Senior Lecturer, Sorbonne Université
